

# OUTERLINK CONSOLE™

OUTERLINK'S BEST-IN-CLASS MAPPING, TRACKING AND DISPATCHING SOFTWARE

Outerlink Console™ is the linchpin of the Outerlink product suite as well as a standalone software offering. Outerlink Console™ Software provides an interactive tracking and dispatching platform for all of your air, ground or marine fleet communication needs. Outerlink Console™ is a truly unique and dynamic visual communications platform.

## KEY FEATURES:

- Functions as CAD software
- Add or delete designated zoom regions to easily toggle between bases at the touch of a button
- Provides a fully customizable dashboard complete with data snapshots
- Push to talk voice and text messaging
- Unique color icons customized to represent unit location, indicate speed, status, direction, and much more
- Address lookup feature allows you to dispatch the closest asset to an assigned location transmitting address coordinates directly to the aircraft, vehicle, or marine unit—just press “accept” and go
- Customizable point of interest (POI) overlay
- Live forecast and weather overlay—customizable to specified bases or areas
- Produce transport reports, archive data and more
